

Bellefond

Single-Vineyard Cuvée
Great Limestone Terroir

Technical Sheet

Terroir: Roquefort Limestone Plateau & Clay-Limestone Soils of Castelvieu (*Oligocene geological period – Astéries Limestone*)

Vintage: 2025

Grape Varieties: 60% Sauvignon Blanc – 40% Sémillon

Number of Bottles Produced: 890 – numbered bottles

Packaging: cases of 6

pH: 3,18

Residual Sugar: 0,4g

Vineyard Farming : Organic

AOC : Entre-Deux-Mers

History

Since 1976, the Bellanger family has been dedicated to producing distinctive wines at Château Roquefort, deeply rooted in the Entre-Deux-Mers region. Conceived by Anne and Frédéric Bellanger and brought to life by the entire team, this single-vineyard cuvée aims to create, with “Bellefond”, a wine that showcases the full qualitative potential of the region’s great limestone terroirs. Several years of dedicated work were required to select the finest vineyard plots, replant the Roquefort limestone plateau with Sauvignon Blanc from massal selections originating from the Sancerre region in the Loire Valley, and renovate the winery. The duo of Stéphane Soubanere, the estate’s Technical Director, and Hannah Fiegenshuh of Derenoncourt Vignerons Consultants, is committed to crafting a great dry white wine designed to complement the finest cuisine. The wine is vinified in new and one-wine oak barrels. Some of the barrels are made by Tonnellerie Ermitage in the Nièvre region, using oak sourced from the Bertrange Forest, while others are produced by Tonnellerie Taransaud in the Charentes region. Following barrel filling, the wine undergoes regular lees stirring for several weeks. After nine months of ageing, the blend for this first vintage was completed in May 2026. The first bottles will be released to the market in autumn 2026.

Tasting Notes

APPEARANCE

Pale yellow with a slight golden hue.

NOSE

Rich and powerful, combining aromas of ripe yellow fruit with subtle flinty notes.

PALATE

The palate is rich and silky, with Sémillon providing structure and delicate fruit flavours, while the mineral character of Sauvignon Blanc grown on limestone soils brings great precision and definition to the palate.
